O R D E R:

In the reference first read above, the Chief Engineer, Minor Irrigation has stated that the Pedda Tank is a Minor irrigation tank formed in Ex-Zamindari period located in Vizianagaram Town and it feeds seven link tanks through its channel Systems to serve an ayacut of 502 acres in J.N.Puram and in Dharmapuri Villages including its direct ayacut. One of its channel joins into the surplus course and feeds two tanks to serve an ayacut about 120 acres in Dharmapuri village in Vizianagaram Mandal. further due to urbanization its ayacut was converted under the tank about 45 acres are proposed to construct Medical college by MANSAS trust and finally comes to 392.45 acres at present. The tank bund and the surplus channel are badly damaged and breached at several places and flood water entering on the residential areas and on roads which causes disturbance to traffic and public due to heavy rains during cyclones occurred in monsoons in every year. Since, the surplus course traverses in Vizianagaram town limits and there is no sufficient land available for formation of the canal banks. Hence it is necessitated to provide retaining walls. He has stated that the proposed retaining walls to the surplus course for a length of 868.00 mts is very much essential to prevent the canal breaches during the rainy season, and also to supply the water to the tail end ayacut without any hindrance.
